

# All Silicone Foley Catheter

100% silicone Foley catheter

*The All Silicone Foley Catheter* is designed to enhance comfort and eliminate risks that may be associated with repeated exposure to latex devices. The clear silicone material enables visualization of drainage and helps minimize encrustation.

## ✓ Superior Silicone Construction

Made from an inert, toxin-free elastomer, silicone Foley catheters will not leach chemicals or water-soluble proteins that can irritate the urethral mucosa and lead to stricture formation. The catheter's silicone material makes it resistant to encrustation.

## ✓ Integral Balloon Design

A patented process forms the balloon as an integral part of the catheter, eliminating rough edges where the balloon meets the shaft. Smooth, proportional eyelets allow atraumatic insertion and maximum drainage.

### Specifications/Ordering Information for Pediatric, 12 Fr, 30ml & 3-Way Catheter Sizes

Catheter Type	Balloon Size	French Size	Quantity	REF#
2-Way	5/10ml	12 Fr/Ch	12	142xx
2-Way	30ml	16-26 Fr/Ch	12	242xx
3-Way	5/10ml	16-26 Fr/Ch	12	345xx
3-Way	30ml	16-26 Fr/Ch	12	343xx

2-Way Foley Catheters covered under Medicare HCPCS Code A4344
